Clap Activated Sound Sensor Switch System Component Specifications

COMPONENT	IMAGE	QUANTITY	DESCRIPTION
Arduino UNO		1	Main microcontroller — reads sensor and controls LED
KY-038 Sound Sensor		1	Detects clap sound and outputs a digital signal (DO pin)
LED (Red)		1	Visual output — toggles ON/OFF on each clap
Resistor (220Ω)		1	Current limiting resistor to protect the LED
Breadboard		1	For prototyping all circuit connections
Jumper Wires		10+	For all electrical connections between components
USB Cable (Type-B)		1	For programming Arduino from a PC
