PIR Motion Security Alerts System Component Specifications

COMPONENT	IMAGE	QUANTITY	DESCRIPTION
Arduino Uno		1	Main microcontroller for control logic
PIR Motion Sensor (HC-SR501)		1	Detects infrared radiation from moving objects
Active Buzzer		1	Produces audible alarm on motion detection
LED (Red)		1	Visual alert indicator
Resistor (220Ω)		1	Current limiter for LED
9V Battery + Connector		1	Power supply for the circuit
Breadboard		1	For prototyping and component connections
Jumper Wires		10+	For connecting components
USB Cable (Type-B)		1	For programming the Arduino
